

Let's end **COVID!**

COVID VACCINE MYTHBUSTERS

There are a lot of myths
circulating about COVID.

GET THE FACTS:

The vaccines are safe.

You cannot get COVID from the vaccines.

The vaccines do not threaten fertility.

You need the vaccine even if you had
COVID; natural immunity doesn't last
forever and you can catch COVID 19 again.

COVID 19 causes long term damage;
many COVID survivors are living
with long-term effects.

The risk of serious illness and death from
the virus is far greater than the risk of
serious side effects from the vaccine.

Children can catch and spread the virus.

You need the vaccine even if you live in
rural areas; living in the country
does not make you immune to COVID.

Vaccines are FREE to everyone
living in the U.S.

We cannot achieve Herd Immunity
by letting the virus spread in the
community; vaccines are the
best way to eliminate the virus.
